

PennHIP Report

Doctor's Copy

Referring Veterinarian: Dr Jay Peters	Clinic Name: CountrySide Veterinary Service WI
Email: jpetersdvm@countysidevets.net	Clinic Address: W3022 Edgewood Trail Appleton, WI 54913
	Phone: (920) 968-3322
	Fax: (920) 968-0091

Patient Information

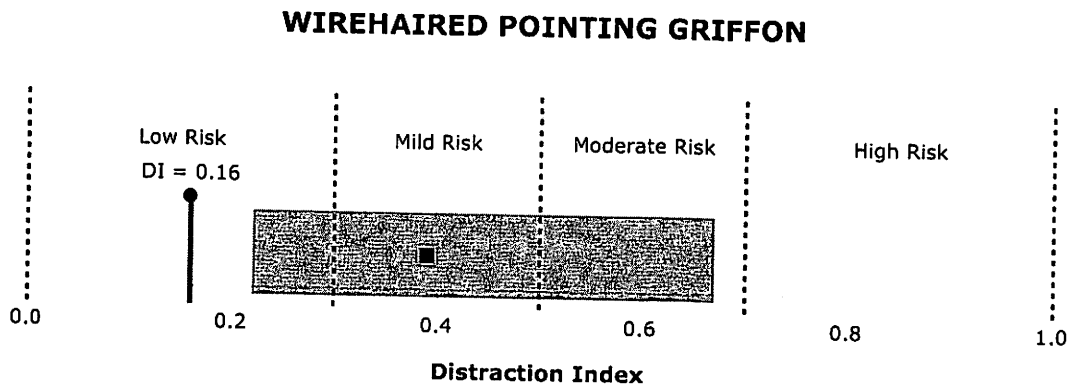

Client: Tatroe, Kelley	Tattoo Num:
Patient Name: Tripp	Patient ID: 3994N
Reg. Name: Soonipi Point's Joyau DU Midwest	Registration Num: SR98705005
PennHIP Num: 119779	Microchip Num: 985112008346620
Species: Canine	Breed: WIREHAISED POINTING GRIFFON
Date of Birth: 20 Apr 2017	Age: 14 months
Sex: Male	Weight: 61.9 lbs/28.1 kgs
Date of Study: 27 Jun 2018	Date Submitted: 27 Jun 2018
Date of Report: 28 Jun 2018	

Findings

Distraction Index (DI): Right DI = 0.14, Left DI = 0.16.
 Osteoarthritis (OA): No radiographic evidence of OA for either hip.
 Cavitation/Other Findings: No cavitation present.

Interpretation

Distraction Index (DI): The laxity ranking is based on the hip with the greater laxity (larger DI). In this case the DI used is 0.16.
 OA Risk Category: The DI is less than or equal to 0.30. This patient is at minimal risk for hip OA.
 Distraction Index Chart:

Breed Statistics: This interpretation is based on a cross-section of 938 canine patients of the WIREHAISED POINTING GRIFFON breed in the AIS PennHIP database. The gray strip represents the central 90% range of DIs (0.22 - 0.67) for the breed. The breed average DI is 0.39 (solid square). The patient DI is the solid circle (0.16).
Summary: The degree of laxity (DI = 0.16) ranks the hip within the tightest 5% of DIs for the breed. This amount of hip laxity places the hip at a minimal risk to develop hip OA. No radiographic evidence of OA for either hip.
Interpretation and Recommendations: No OA/Minimal Risk: Unlikely to show radiographic evidence of hip OA; even more unlikely to develop clinical signs of hip dysplasia. **Recommendations:** Normal to strenuous activity is permitted. Keep

lean: try to maintain BCS at 5/9 for a longer and healthier life.
Breeding Recommendations: Please Consult the PennHIP Manual.

Comments:

Thank you for following policy and sending at least 2 Distraction views, as confirmation, when the hips appear tight (less than 0.30 DI).
