

Strip from corner of eye, straight down to beard.  
(some beard will be stripped off)

Strip from that vertical line back to ear. (Pull a bit of the eyebrow up so it is not stripped short) you can see her eye brown still hangs down. ( you will want to run the blue stripping knife thru the eyebrow a few times tho to thin it out but not nearly as short as the rest

(she needs some hair stripped out of her ear, the orangey stuff but I didn't have time to do that)

Strip under neck to the point on the chest so beard & chest stand out.

I strip a lot from the back half of the ear down to the shoulder then down to the point on chest.

( on this side I groom just below the dark spot on her neck where the shoulder starts to the point of chest) then a bit on the top of her neck so it all blends in.

Strip hair on top of head so it lies flat, there should be eyebrows but they should not cover the eyes.
